## EXPERIMENT

ENCODE THE NUMBER

### 3R23A112 Description

You work in the message encoding department of a national security agency. Every message that is sent from or received in your office is encoded. You have an integer N, and each digit of N is squared and the squares are concatenated together to encode the original number. Your task is to find and return an integer value representing the encoded value of the number.

38R23A11723BR23A1172BR23A11723BR23A11723BR23A1172BR23A1172BR23A1172BR23A1172BR23A1172A172BR23A1172BR23A1172BR23A1172

**input1:** An integer value N representing the number to be encoded.

#### **Output:**

Return an integer value representing the encoded value of the number.

Sample Input:

167

Sample Output:

13649
